2 Mathematics of micro-Doppler effect Mathematics of the micro-Doppler effect can be derived by introducing vibration or rotation to conventional Doppler analysis. A target can be represented as a set of point scatterers. The point scattering model may simplify the analysis while preserving the micro-Doppler effect.

analysis of ICT usage patterns. The analysis includes data from (2008), 18 European countries Korea (2008) and Canada (2007). Inequalities in computer and Internet use are analysed in a two-step approach. First, the paper tries to better quantify and understand the factors that separate the "haves" and the "have-nots".

There exist several types of general purpose computer systems. These types are grouped together into two major computer classes, comprising sequential or conventional computers, and parallel computers, respectively. The class of sequential or conventional computer systems comprises: • Laptops and palmtops. These are small, portable computer systems.
