Applications Modelling and simulation. One application of scientific modelling is the field of modelling and simulation, generally referred to as "M&S". M&S has a spectrum of applications which range from concept development and analysis, through experimentation, measurement and verification, to disposal analysis.

T. Ritchey: General Morphological Analysis _____ 3 The first to use the term morphology as an explicitly defined scientific method would seem to be J. W. von Goethe (1749-1832), especially in his "comparative morphology" in botany.

Metabolic network reconstruction and simulation allows for an in-depth insight into the molecular mechanisms of a particular organism. In particular, these models correlate the genome with molecular physiology. A reconstruction breaks down metabolic pathways (such as glycolysis and the citric acid cycle) into their respective reactions and enzymes, and analyzes them within the perspective of ...

Risk Analysis concerns itself with the quantification of risk, the modeling of identified risks and how to make decisions from those models. Quantitative risk analysis (QRA) using Monte Carlo simulation offers a powerful and precise method for dealing with the uncertainty and variability of a problem.

Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

13 Qualitative data mining Consider the mining of numerical data. Usually, in machine learning used for numerical data mining, the goal is to construct a numerical function of the form $y = f(x_1, x_2, \dots)$ where y is a distinguished variable called the dependent variable, and x_1, x_2, \dots are attributes (or independent variables).

Airspace Design requires sophisticated modelling and simulation tools to refine and validate airspace design proposals. It carries out operational analysis of airspace structure (route network and sectorisation) combined with various traffic distribution options in support of the Network Operations planning activities.

This journal has partnered with Heliyon, an open access journal from Elsevier publishing quality peer reviewed research across all disciplines. Heliyon's team of experts provides editorial excellence, fast publication, and high visibility for your paper. Authors can quickly and easily transfer their research from a Partner Journal to Heliyon without the need to edit, reformat or resubmit.

1. Introduction. Global Sensitivity Analysis (GSA) is a term describing a set of mathematical techniques to investigate how the variation in the output of a numerical model can be attributed to variations of its inputs.

Bayes, statistics, and reproducibility: "Many serious problems with statistics in practice arise from Bayesian inference that is not Bayesian enough, or frequentist evaluation that is not frequentist enough, in both cases using replication distributions that do not make scientific sense or do not reflect the actual procedures being performed on the data."

Export 3D molecular graphics for visualization and publication. Interactive 3D modeling and real-time animation lets you use molecular building blocks or atom-by-atom construction to visualize even the most complex structures -- whether protein, DNA, organic or inorganic -- as fully-realized, space-filling entities. You can even create and playback movies of mol

This analysis suggests that the introduction of a PrEP programme for MSM in the UK is cost-effective and possibly cost-saving in the long term. A reduction in the cost of antiretroviral drugs (including the drugs used for PrEP) would substantially shorten the time for cost savings to be realised.
