In a testy op-ed piece published in Science more than a century ago (), the American botanist and museum curator William J. Beal asked, "What is nature study?" Beal posed the question at a time when educators across much of the United States had embraced the movement to provide elementary school students with regular firsthand exposure to the natural world.

understanding of human nature requires understanding our bodily nature as well. God did create purely spiritual beings, the angels, who are nothing more than dis-embodied minds, but that is not what we are. We are, essentially, mind-body composites. So to understand human nature, one must study not just our mental
