

normality and pathology in pdf

Normality is a behavior that can be normal for an individual (intrapersonal normality) when it is consistent with the most common behaviour for that person. Normal is also used to describe individual behaviour that conforms to the most common behaviour in society (known as conformity). Definitions of normality vary by person, time, place, and situation – it changes along with changing ...

Neurodiversity is an approach to learning and mental health that argues various neurological conditions are the result of normal variations in the human genome. " Neurodiversity" is a portmanteau of "neurological" and "diversity" that originated in the late 1990s as a challenge to prevailing views of certain neurological conditions as being inherently pathological, instead asserting that ...
