Offshore Structure Modeling - World Scientific

Modelling of shallow foundations for offshore structures since these are dynamically sensitive structures in which the response depends critically on the stiffness of the structure/foundation system.

Offshore Structure Modeling Advanced Series On Ocean

In the context of ships and offshore structures ` Structural analysis using finite element analysis is a mature technology ` Most innovation is occurring in hydrodynamic analysis using computational fluid dynamics (CFD) techniques ` The greatest uncertainty in design of ships & offshore structures is in predicting environmental loads

Engineering Simulation for Ship and Offshore Structures

The model structure is a four-legged tubular structure scaled-down from a realistic offshore platform. The prototype is 89.6 m high, from which 67.2 m are underwater. The original physical model, at a scale 1:28, has been subjected to an extensive experimental investigation earlier reported by Mendes et al. [3].

Numerical modelling of wave-current loading on offshore

in the design of offshore structures, (Sarpkaya & Isaacson, 1981; Chakrabarti, 1987; Graff, 1981; DNS-OS-101, 2004). These subject areas, though not mutually exclusive, would include: $\hat{\epsilon}$ Hydrodynamics $\hat{\epsilon}$ Structural dynamics $\hat{\epsilon}$ Advanced structural analysis techniques $\hat{\epsilon}$ Statistics of extremes amongst others.

Introduction to the Analysis and Design of Offshore

Using advanced finite element analysis tools, you can design and analyze complex offshore structural systems with confidence to ensure compliance with industry design codes. This integrated structural modeling, analysis, and simulation environment allows you to design offshore structures to meet local operating conditions from wave, wind, current, and seismic loads.

Offshore Structural Design, Modeling, and Analysis Solutions

The steel template type structure consists of a tall vertical section made of tubular steel members supported

by piles driven into the sea be with a deck placed on top, providing space for crew quarters, a drilling rig, and production facilities.
