Oil, Water, and the Future Oil is important in today's world. It powers trains, planes, and cars; it powers industry and farms. It also creates wars. For example, many people now believe that the war in Iraq was more about oil than terrorism. Unfortunately, there is a limited supply of oil, and it's going to

Oil, Water, and the Future - Heads Up English

The future for the oil and gas industry has changed. For over 100 years the story was one of growth in production to supply a largely Western-driven market, and of competition between private

What next for the Oil & Gas industry? - KPMG

Oil speculators could spike the price higher if they panic about future supply shortages. That's what happened to gas prices in 2008. Traders were afraid that China's demand for oil would overtake supply. Investors drove oil prices to a record \$145/b. These fears were unfounded, as the world soon plunged into recession and demand for oil dropped.
