I know I know, you already know protein is important at every meal, but did you know that research actually shows that 30 grams of protein at a meal can stimulate muscle growth? We tend to get very little protein at breakfast, then slightly more at lunch, then too much at dinner (the excess just turns to fat or it turned to glucose unless you actually use it).

30 grams of protein for breakfast. Do it.

Animal testing, also known as animal experimentation, animal research and in vivo testing, is the use of non-human animals in experiments that seek to control the variables that affect the behavior or biological system under study. This approach can be contrasted with field studies in which animals are observed in their natural environments or habitats.
