Trauma Information Pages, Articles: Ellert Nijenhuis, et

Grief is a multifaceted response to loss, particularly to the loss of someone or something that has died, to which a bond or affection was formed. Although conventionally focused on the emotional response to loss, it also has physical, cognitive, behavioral, social, cultural, spiritual and philosophical dimensions.

Kathleen Brown-Rice. The theory of historical trauma was developed to explain the current problems facing many Native Americans. This theory purports that some Native Americans are experiencing historical loss symptoms (e.g., depression, substance dependence, diabetes, dysfunctional parenting, unemployment) as a result of the cross-generational transmission of trauma from historical losses (e ...

About This Program. Target Population: This program is not a client-specific intervention, but a full-system approach that targets the entire organization with the intention of improving client care and outcomes. The focus is to create a trauma-informed and trauma-sensitive environment in which specific trauma-focused interventions can be effectively implemented.
