The SIPP uses much more detailed disability criteria than the ACS. This more expansive definition means that the SIPP identifies more individuals with a much wider variety of disabilities, including, but not limited to, those with upper body and mental health disabilities as well as those with difficulties with activities of daily living; these individuals are unlikely to be captured by the ...

Participants in the Guidelines for Assessment and Instruction in Statistics Education (GAISE) project have created two reports of recommendations for introductory statistics courses (college level) and statistics education in Pre-K-12 years.

### **Guidelines for Assessment and Instruction in Statistics**

Definition 1: The covariance between two sample random variables  $x$  and  $y$  is a measure of the linear association between the two variables, and is defined by the formula. Observation: The covariance is similar to the variance, except that the covariance is defined for two variables ( $x$  and  $y$  above) whereas the variance is defined for only one variable. In fact,  $\text{cov}(x, x) = \text{var}(x)$ .

How Science Has Revolutionized the Understanding of Drug Addiction For much of the past century, scientists studying drugs and drug use labored in the shadows of powerful myths and misconceptions about the nature of addiction. When scientists began to study addictive behavior in the 1930s, people addicted to drugs were thought to be morally flawed and lacking in willpower.
