Building Stones. Building stones are the naturally occurring massive, dense rock which can be cut or shaped into blocks or slabs for use in wall, paving, roofing materials or other construction works. They have been used as building material since very early period of our civilization. Be it igneous, metamorphic or sedimentary,...

### **Common Building Stones - Characteristics of Building Stones**

The following are the requirements of good building stones: ( i) Strength: The stone should be able to resist the load coming on it. Ordinarily this is not of primary concern since all stones are having good strength. However in case of large structure, it may be necessary to check the strength.
