

### **who lives here animals pdf**

On average we receive 14 calls a day about animals affected by litter and these types of calls spike particularly high in the summer months. Even so, as pet owners go directly to vets, and many injured wild animals are never found, it's estimated that the actual figure of animals injured by litter is much higher than we currently know. The wildlife is suffering, and they really need our help.

The dog flea (*Ctenocephalides canis*) is a species of flea that lives as an ectoparasite on a wide variety of mammals, particularly the domestic dog and cat. It closely resembles the cat flea, *Ctenocephalides felis*, which can live on a wider range of animals and is generally more prevalent worldwide. The dog flea is troublesome because it can spread *Dipylidium caninum*.
